FEEDING  
SCHEDULE

## SUNLEAVES DRY GUANO TOP-DRESSING

10-1-1

8-3-1

0-7-0

0-10-0

Early Vegetative	½ Tbsp			
Mid Vegetative	½ Tbsp	½ Tbsp		
Late Vegetative		1 Tbsp		
Transition		½ Tbsp	½ Tbsp	
Early Flowering			1 Tbsp	½ Tbsp
Mid Flowering			½ Tbsp	1 Tbsp
Late Flowering			½ Tbsp	1 ½ Tbsp

All usage rates are per gallon of soil.

**Flush with plain water before harvest.**

## SUNLEAVES DRY GUANO SOIL MIX\*

+

Add 1 Tbsp of each guano per gallon of soil and mix thoroughly.

\* For optimum results, add 1 tsp of Sunleaves Soil Sweetener per gallon of soil

Feeding is by no means an exact science. There is no substitute for attention to plants. Watch plants closely and adjust feedings according to plant response. Plants' needs depend on many factors including light, soil conditions and composition, ambient temperature, etc.

If plants show signs of stress, immediately flush them with plain water and reduce feedings. As with any fertilizer, plants will only use what they need and any excess has the potential to cause harm.

## SUNLEAVES GUANO TEA

10-1-1

8-3-1

0-7-0

0-10-0

Early Vegetative	1 Tbsp			
Mid Vegetative	1 Tbsp	1 Tbsp		
Late Vegetative		2 Tbsp		
Transition		1 Tbsp	1 Tbsp	
Early Flowering			2 Tbsp	1 Tbsp
Mid Flowering			1 Tbsp	2 Tbsp
Late Flowering			1 Tbsp	3 Tbsp

All usage rates are per gallon of water.

**Flush with plain water before harvest.**

## Tea Brewing Instructions

Equipment Needed: air pump, air stone, air tubing, heat mat, 6 gallon bucket and screen

1. Fill the 6 gallon bucket with warm water and place it on the heat mat.
2. Connect the air stone and pump with tubing, then place the air stone at the bottom of the bucket.
3. Plug in the air pump to aerate the water, and plug in the heat mat to warm the brew.
4. Add Sunleaves Guano according to the feeding schedule above.
5. Place a screen or similar material on top of the bucket to keep the tea from foaming over.
6. Let brew for at least 48 hours.
7. Remove the air stone and stir the tea to mix well before application.

If using the Sunleaves Guano tea in a hydroponic system, strain before using to remove any large particles.
